Coding Club

In response to the parent satisfaction and communication survey as well as student feedback we are offering an opportunity for students to participate in a coding club. This extra curricular opportunity will involve students learning about some popular coding processes and programs as well as sharing their own knowledge with other students.

Any parents who have a keen interest in coding are encouraged to contact the office to offer support and expertise. The club will occur once a fortnight on a Friday afternoon 2.45-3.25pm. Please note as this is the time allocated for Stage 3 Sport students in Year 5 and 6 will need to ensure they regularly engage in physical activity as per Department of Education Policy and are therefore encouraged to attend coding once a month rather than the fortnightly meetings.

Parents are asked to sign the permission slip below and return to the office by Tuesday 1 March to ensure appropriate planning can occur. Please note that we are unable to organise for a large number of students so those who are interested are encouraged to return their note to the office as soon as possible. Should the number of interested students exceed organisational capabilities then year groups will be allocated (e.g. Year 1-4 Term 1, Year 5-6 Term 2 etc).

Peter Graham
Deputy Principal
